UTOPIAN
ACADEMY FOR THE ARTS
HIGH SCHOOL

Course Description
AV Tech & Film Production Pathway

- **AV Tech & Film** focus is designed to nurture the talents of aspiring filmmakers, actors, and television producers. This course offers comprehensive training in acting, audio video production, and television broadcasting. Scholars will learn about scriptwriting, directing, cinematography, and editing, as well as acting techniques, character development, and stage presence. The curriculum includes hands-on projects where scholars will create their own short films, participate in acting workshops, and produce television segments. By the end of the course, scholars will have a strong foundation in film and television production, ready to pursue further studies or careers in the entertainment industry.

- **Acting** offers scholars a comprehensive education in performance arts, emphasizing both technical skills and creative expression. Scholars learn essential acting techniques, including voice modulation, body language, and character development, while also gaining technical training in directing, camera work, editing, and lighting. The program provides hands-on experience with industry-standard equipment and technology and offers valuable industry opportunities. Scholars have the chance to interact with professionals, participate in talent contracts, and book roles in theatre, commercials, movies, and television shows. This course aims to prepare scholars for successful careers in the entertainment industry by fostering their technical skills and creative talents.
